

The machine applies to the AC power cord, DC power cord, USB cable, video cable, HDMI high-definition cable, and other types of transmission line with a plastic bag core twist tied into a bundle, and can also be used to tape other use coated core sealing with. This machine can reduce the fatigue strength of the staff, improve work efficiency, saving Ties characteristics. Employees simply put the line winding at stampede footswitch automatic winding machine, manually and then around the mouth of a good line on the Norse, the machine can automatically Ties. The machine can set the number of winding, winding speed can be adjusted and set tie-line length, number of turns, can yield count. This machine adopts PLC program control, text display, parameter setting, easy to operate.

Specifications:

No.	Project Name	Specifications	
1	Supply Voltage	AC220V	
2	Power frequency	50HZ/60HZ	
3	Rated Power	120W	
4	Winding speeds	Can be set, can be adjusted	
5	The number of coil winding	Can be set	
6	Norse winding specifications	The length of the Norse	Applicable winding diameter specifications
		120-160mm/200mm	Applicable diameter ϕ 0.1-35mm
7	The number of bar coil	Can be set (recommended 2-4 laps)	
8	Cable ties	Plastic bag, core	
9	Protector	Fuse, fault alarm shutdown	
10	The size of the machine	400x380x580mm	
11	Total weight	40Kg
